

## Environmental Policy

*Oceala regards employee environmental awareness and the protection of the environment as key business objectives.*

We are committed to operating and developing systems that ensure compliance with environmental legislation and operational requirements which directly relate to our activities and identified environmental aspects and impacts.

As a company providing a scope of waste management and recycling solutions, we seek to be efficient in the use of natural resources, including energy and promote the benefits of recycling.

Through an ongoing review of our activities, we seek to minimise the risk of environmental harm arising from accidental emissions or discharges through the reduction of the use of potentially harmful substances and by ensuring suitable storage, containment and waste disposal provisions.

We also recognise our responsibilities to others and seek to act accordingly so that our activities are conducted in a manner that is positive and acceptable to the community in which we operate and service. Furthermore, we aim to work in partnership with our customers, suppliers and subcontractors to strengthen our environmental performance and where appropriate, assist them to achieve their own environmental objectives and targets.

Our commitment to this Environmental Policy Statement is underlined by the development of an ISO 14001 Environmental Management System through which we can pursue the goal of continuous improvement.
